

# CONSIGNMENT INVENTORY PROGRAM

*Stay ahead of stocking issues with our lumber consignment program.*

*\*Some or all of our products are available as FSC® certified on request only*

# What is Inventory Consignment?

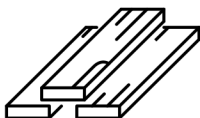

Our program ensures you have the lumber you need when you need it without carrying extra inventory.

## BENEFITS OF THE PROGRAM

- Consistent inventory levels for all production needs.
- Improved cash flow.
- Greater pricing stability & volume pricing.

## How it works

You and our sales team agree on pricing, volume, lumber grades, and inventory levels of each item you need. The lumber is shipped to your warehouse.

As you use the lumber, you'll report it to M&O. Once usage is reported, M&O begins to build the next truckload for your warehouse.

M&O proactively communicates with you to ensure necessary inventory levels at all times. After a truckload is built, the order is delivered to your warehouse.

M&O continually monitors and stocks your warehouse based on your usage history, current inventory levels, and projected needs.
